EDUCATION

Bachelor of Engineering (B.E), Information Science and Engineering
Global Academy of Technology: CGPA: 7.92

2022 - 2026

SKILLS

Programming Languages	Java, JavaScript
Front end technologies	HTML, Tailwind CSS, React.js
Backend Technologies	Node.js, Express.js
Database	SQL, MySQL, MongoDB
Version control	Git, GitHub
Core Technical skills	OOPs, SOLID principles, REST API

PROJECTS

Secure MERN Task Dashboard with MySQL Integration

Tech Stack: React.js, Node.js, Express.js, MySQL, JWT, Tailwind CSS, REST APIs, Git

[GitHub](#)

- Developed a full-stack task management dashboard with secure JWT-based authentication and MySQL database integration
- Implemented user authentication features including login, registration, and password reset with encrypted password storage.
- Designed a dynamic dashboard displaying real-time statistics (active, pending, completed, priority-based insights)
- Added advanced features such as search, filtering, and CSV export functionality for efficient data management.

TechStore – Modern React E-Commerce Application

Tech Stack: React.js, JavaScript (ES6+), CSS3, LocalStorage, Vite, Git, GitHub

[GitHub](#) — [Live Demo](#)

- Developed a responsive e-commerce frontend application using React.js with a clean, component-based architecture.
- Implemented Add to Cart, Wishlist toggle, dark/light mode switching, and dynamic product listing using React state.
- Built a dynamic cart system with quantity management, item removal, cart count, and total price calculation.
- Designed and implemented search, brand-based filtering, and sorting (price and rating) for enhanced user experience.

Pixel-Perfect Responsive Product Page

HTML5, CSS, JavaScript

[GitHub](#) — [Live Demo](#)

- Developed a responsive product landing page as part of a real-world development assignment (Gushwork)
- Built a responsive product page and Implemented sticky header and interactive image carousel with zoom functionality
- Enhanced user experience with smooth animations, responsive layouts (Flexbox and Grid), and interactive components.
- Optimized performance using efficient DOM manipulation and lightweight, cross-browser compatible JavaScript.

INTERNSHIP

Full Stack Java Developer Intern

CampusPe (Edufu Technologies Pvt Ltd.) — Jan 2026

- Built and deployed a production-ready MERN Stack Authentication and Task Manager system
- Developed RESTful APIs using Node.js and Express.js covering 12+ endpoints for authentication, item management, statistics, and CSV export.
- Completed structured training in HTML, CSS, JavaScript, React, Node.js, Express, MySQL,

CERTIFICATIONS

- Database Management & SQL - [Udemy](#).
- GenAI for Everyone – [Coursera](#).
- Artificial Intelligence Fundamentals -[IBM SkillsBuild](#)
